| For each additional person, add: | \$4,020                         | \$5,347  | \$6,030  | \$8,040  | \$12,060  | \$16,080  |

**Notes:**

- The 100% column shows the federal poverty level for each family size, and the percentage columns that follow represent income levels that are commonly used as guidelines for assistance programs. Example: A family of four with annual income of \$34,000 is between 133% and 150% of the Federal Poverty Level (FPL).
- You ***may be*** eligible for tax credits and cost subsidies if your household income fits on this chart and you have no other source of health care coverage.
- Income is calculated based upon Modified Adjusted Gross Income (MAGI), so if your income is ***near*** the limits on this chart, you ***may be*** eligible for cost sharing subsidies and/or premium tax credits because the income guide is based upon Gross Income, not MAGI.
- This chart is for demonstrative purposes, only. Contact the Marketplace for advice on cost sharing subsidies and/or premium tax credits.
